

## Michèle Auger Award for Young Scientists' Independent Research (2022)

In late 2018, long time Editorial Board Member of the Biophysical Reviews journal, Professor Michèle Auger, sadly succumbed to illness. As a mark of our respect for Michèle, the Biophysical Reviews' Board, together with the support of Springer-Nature Corporation, created a perpetual memorial award in honor of her life and service. The, 'Michèle Auger Award for Young Scientists' Independent Research', is to be granted each year to a single candidate performing biophysical research who, at the time of application, is under 40 years of age. The award will consist of a plaque and a free personal subscription to the journal along with an invitation to submit a single author Review article to Biophysical Reviews. The winner's published Review will carry a short foreword about the life of Professor Michèle Auger, along with her work associated with teaching and training the next generation of biophysical scientists. Nominations can be made in the form of a candidate's one page curriculum vitae, along with five original manuscripts, to be submitted by email to either the Chief Editor, or any one of the Biophysical Reviews' Executive Editors, prior to 2021, October 31<sup>st</sup>. Judging will be carried out by a special committee assembled from the Biophysical Reviews' Editorial Board, with this assembly taking place after the submission deadline. Results will be announced in December, with the winner's single author Review to be published in the following year.

Submissions can be made via email in the form described above to any of the following.
